# ResortCams.com Cameras & Hosting

# Camera Systems

## Hard Hats

There are SEVERAL PTZ systems on the market. However, most are not rated for years of pan, tilt and zooming that is necessary for tourism implementations. Additionally, many camera systems are not rated for temperatures below 32 degrees or for marine applications such as marinas, coastal areas or winter locations.

ResortCams.com only uses the best camera systems available on the market to ensure the best in quality images, proven reliability and long-term use. Choosing the best equipment has provided our clients with systems that have been running more than 15 years in many cases. We are currently only offering the system(s) shown below.

*The listed prices include camera, dome housing, Axis POE 60w Midspan (5900-334) to Power Camera & Axis Wall & Pole Combo Mount (for pole or post/facia) T91L61 Wall & Pole Combo Mount, 5801-721, programming and support on implementing on your network – as well as script to place LIVE image on your website. We do not install systems. Any electrician or general maintenance person can mount a camera and call our techs and we will configure remotely.*

HD Pan, Tilt & Zoom Camera Options	HD VERSION	PRICE

<p><b>AXIS Communications Q6155-E 60HZ High Speed Network Camera, 0934-004 - 1080</b></p> <p>Compact top performance HDTV PTZ for outdoor and indoor use with unique Laser Focus giving perfect focus. HDTV 1080p resolution in 30fps, perfect image quality in all directions without distortion due to Axis's Sharpdome technology. Repaintable surface, will easily blend into the surroundings. 30x zoom 120dbWDR, EIS, automatic defog, Advanced gate keeper and Lightfinder. Midspan included                      AXIS Q6155-E's built-in laser makes it the fastest-focusing PTZ camera on the market. Under difficult circumstances, like scenes with low light, low contrast, or point-shaped light, AXIS Q6155-E really stands out. Its 100% safe laser beam measures the distance between the camera and an object in a fraction of a second, delivering perfectly focused images every time.</p>	1080	\$5,695

# Live Stream Services

## Live HD Stream Hosting & More

We will program your camera to work with your internet connection and provide you with the credentials to PAN, TILT and ZOOM the camera. You can even control the camera from your phone. We will provide you with script to provide to your web designer to make the live video show on your website in a 700 pixel wide screen (larger than most) and it will allow for FULL SCREEN DISPLAY.

\* Note: The network cameras CAN host only up to 15-20 visitors at one time, so that is why video server hosting is needed to handle an unlimited number of visitors. Most LIVE VIDEO hosts throttle users, whereas our hosting allows an unlimited audience.

*Ask us about hosting your LIVE STREAM with NO MONTHLY HOSTING FEES for the life of the camera!*

<b>Annual LIVE STREAM HOSTING (unlimited connections)</b>  Standard monthly hosting plans are billed annually in advance and must be paid and renewed by credit card. We accept all major credit cards: Visa, MasterCard, Discover, American Express & Diners Card.	<b>\$ 1,500.00</b>
Traffic Driving Banner – Annual placement  <b>LIFETIME HOSTING SAVES THOUSANDS - ASK US ABOUT A ONE TIME HOSTING PAYMENT!</b>  In some cases, we can offer a ONE TIME, upfront payment and WAIVE the annual live stream hosting fee for the life of the camera system. Over a ten-to-fifteen year life of a camera, this can save as much as \$20,000!	<b>\$ FREE</b>

# The Marketing Advantage of ResortCams

*There are Webcams, and then there are Marketing Webcam Synergies.*

## **Think about it this way.**

You could purchase cameras from numerous electronics or security firms online nationally. Most often, you are left to figure out the setup and any accessibility. Then you'll need to find a resource to host the LIVE CAMERA stream to your website. You'll then need to figure out how to code the script to display the live image to your website or other devices.

Then what? So, your website now has a LIVE CAMERA on it that very few people will ever find unless they already know about your business, resort or location.

What if there was a way of promoting that new camera location to a vast audience of people who LOVE to virtually visit live webcams? That is where ResortCams.com provides real value.

ResortCams.com received 14,600,000 unique visitors in the previous 12 months (updated Feb 20, 2023) – averaging more than 40,000 visitors a day. During peak snow events, autumn colors and special weather events we see traffic soar to 100k visitation in one day. On January 16, 2022 we set a new record of over 745,000 camera views! During the last calendar year we delivered over 49,000,000 page views. ResortCams.com is found on Google for 17,200 keywords with 2,200+ rankings on the first page of Google. That guarantees that your new camera will get exposure.

ResortCams.com also has a network of more than 110 television stations that login and use our website to show LIVE IMAGES via their weather forecasts and more. Jim Cantore, Paul Goodloe and the team at THE WEATHER CHANNEL use our national network of cameras often on the air and via their Facebook feeds. Hundreds of NBC, ABC, CBS and FOX meteorologists use our cameras and tweet captures to their audiences.

This synergy guarantees that your website will get vastly more visitors than if you simply tried to promote a camera yourself.

We use only the best, highest-resolution, HD camera systems that are protected from the elements.

Call us today to get your system delivered and implemented.
